The 2025-2026 Elon FamilySearch Center (FSC) Family History Seminars will be focusing on:

- Gleaning every detail that may be found in various record types commonly used in genealogical and family history research; and
- Analysis, correlation and application of that data to learn more about a family's history.

The schedule will include seminars that provide an in-depth look at each record type, followed by a **Putting it all together** workshop in which participants will use the records to address specific research objectives. These workshops will be designed so that online attendees can participate remotely.
